

## HYDROBLAST TDS 3000 MB

### Description

TDS 3000 MB nozzle for UHP abrasive coating removal.

The newly developed TDS 3000 MB is especially easy to operate and equipped with smoothly working bearings allowing long term operation up to 1.000 hours. The nozzle is developed and produced for Hydroblast and is designed for connections 9/16 UNF LH and M 14x1,5 making it suitable for many different applications. Mechanical Rotor speed adjustment is protected against dirt and can be adjusted with a regular screw driver.

### Technical specifications

TDS 3000 MB 3000 bar max. 45 l/min

Form nozzle shape 21

Speed 550 – 3500 1/min

Medium temperature max. 85`C

Nozzle carrier RD – 03 / RD – 06 from Titan

Weight without carrier 1,45 kg.

### Typical applications

Surface preparation:

- Cleaning
- Roughening
- Removing coatings
- Concrete demolishing
