TST Safety Hose Shroud 2800 Bar Pressure

Function and Fitting

The Hydroblast TST Hose Shroud offers enhanced protection from pinhole occurrences near the operator and provides a cost effective safety solution.

- Highly burst resistant
- Highly abrasion resistant
- Highly chemical resistant
- Enhanced safety

The safety shroud is held securely in place with an adjustable strap.

The sleeve material has been tested and approved to international standards for 2800 bar / 40,000 psi and has been found to be very effective in reducing the concentrated stream of pinhole leaks.

Manufactured using aluminum tubing, this gives it strength whilst adding minimum weight.
